What can we do to make the world a better place?

Since the human exists, he affects the nature in a bad way. He builded cities, burned rainforest to grow food and since the Industrial-Revolution the human builds a lot of machines. These machines facilitate our everyday life and we couldnt life without them, but also the machines destroy the nature, so by now we should think about this question.

In the course of history some genious people thought about new ideas to protect the nature, so that our progeny can live at this planet too. The scientists developed the concept of „regenerative energies" to lower the air-polution while producing electric energy. But also the European-Union care about protect the nature, so thee EU adobts laws to lower the ecological demage.

Plenty of people think, that they can not do anything to protect the nature, but that is wrong. As individual people, there are much things you can do make this world a better one. Just turn the lights and the radio off, when you left the room. Don't left any waste in the nature. There are plenty of simple things you can do to help the nature regenerating. An other possability is to donate some money at ecology groups.

There is not just the ecological aspect. You can also improve this world in a social way. Everyday you can use a lot of chances to help other peolple. Just help a grandma to cross the street or donate money at homeless persons.

You see that you can improve this world whenever you want, so try it and make this world a better one for you, for your child and your grandchilds
